

Report On Elevator Safety And Awareness Training Conducted **on 21-12-2021**

ADHARV SURESH (Safety Engineer)

Elevators are one of the most secure modes of transportation. It's critical to understand not just how to ride elevators properly, but also what to do if the elevator becomes stuck. Incidents of workers being caught in/between moving parts of elevators and escalators, being in or on elevators or platforms that collapse, or being struck by elevators or counterweights are rare, but panic attacks caused by elevators when they stop or become stuck are becoming more common. Recommendations for preventing elevator and escalator-related deaths and injuries include providing employees with awareness training.

As part of occupational safety training, the safety wing provided elevator awareness training to KSDMA staff with the assistance of TK Elevator India Pvt Ltd. The programme began at 3:00 pm on 21-12-2021 and lasted nearly two hours.

ELEVATOR SAFETY AWARENESS AND RESCUE TRAINING is conducted by following people

- Mr Mr Adharv Suresh (Safety Engineer, KSDMA)
- Mrs Mrudu Krishna K R (Field Assistant, KSDMA)
- Mr Don Bosco Thomas (Safety Dept, TK Elevators)
- Mr Ajikumar (Service Dept, TK Elevators)

The programme began with an introduction and concluded with a questioner and doubt clarification. According to the feedback, everyone found the session to be very useful and enjoyable.

List of Staff Participated in the session
