

SITREP – 2, 22300 Hrs on 09/06/2025

Explosion on WAN HAI 503 (IMO no – 9294862, Flag Singapore) West of Kerala

1. Incident Overview:

On 09 June 2025, an incident was reported at approximately 0950 hrs of a Singapore flagged container vessel Wan Hai 503 (IMO Number: 9294862), under direct management of Wan Hai Lines and currently en route to Nhava Sheva, experiencing a **container explosion** resulting in a **significant onboard fire**. The vessel was located at Lat. 11°37.6'N, Long. 074°37.4'E, approximately southwest of the Indian coastline, 44 nautical miles (nm) from Azhikkal, Kerala. The fire originated in the underdeck cargo hold, causing deck-level container damage, triggering an onboard emergency response and engulfing the entire vessel.

Figure 1: Fire and explosion onboard

2. Response Actions Initiated:

The Indian Coast Guard (ICG) and the Information Fusion Centre Indian Ocean Region (IFC-IOR) were immediately informed of the incident by the Directorate General of Shipping (DGS).

The Indian Coast Guard promptly initiated emergency operations. Three surface vessels—ICGS Rajdoot, Sachet, and Samudra Prahari—have been deployed, with Samudra Prahari having arrived on site at 2145 hrs IST. Two Dornier aircraft were also launched for aerial surveillance. The Indian Navy diverted a vessel for search and rescue (SAR) and rescued the 18 crew members (Crew List attached). Additionally, ETV Water Lily and tug Offshore Warrior, with firefighting capability, have been mobilised by the DGS and shipowners, with estimated arrival at the incident site by 10 June afternoon. The Directorate General of Shipping (DGS) has formally informed the Flag State, Maritime and Port Authority (MPA) of Singapore, which has confirmed its engagement and is dispatching an investigator who is expected to reach Kochi on 10 June.

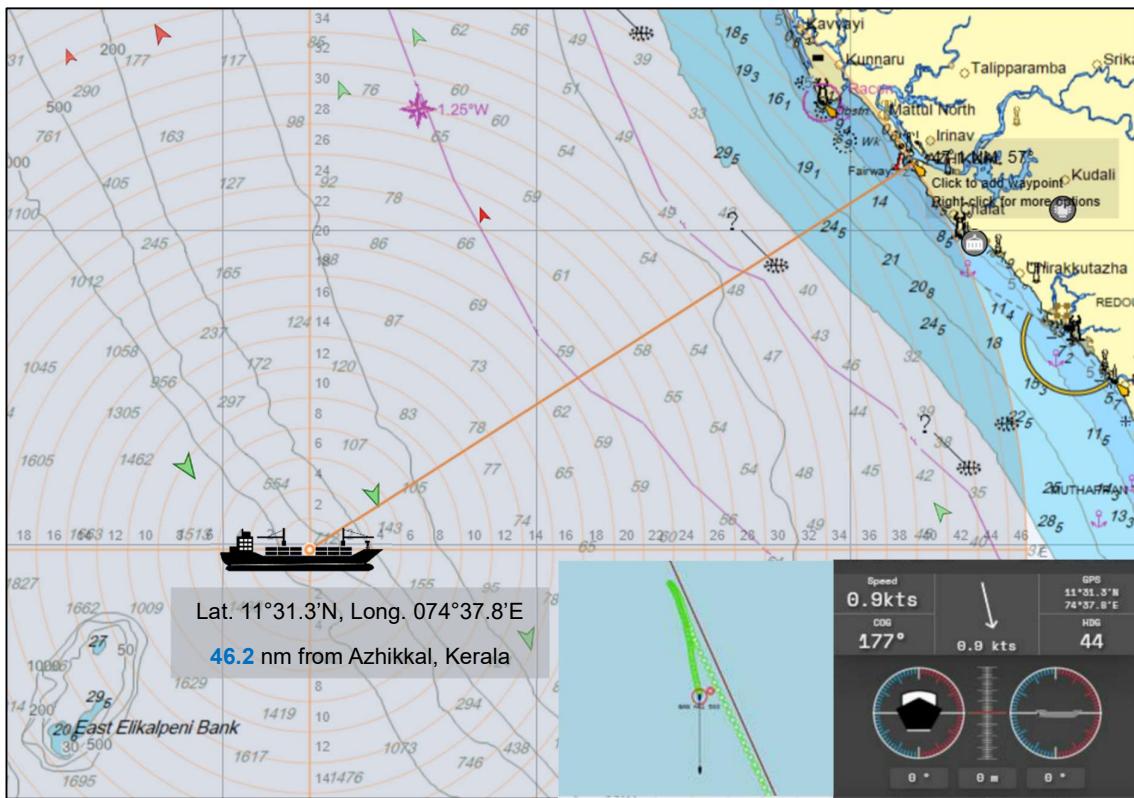

Figure 2: Present location of Wan Hai 503 (**Vessel has drifted in southerly direction**)

3. Present Status:

A total of 18 crew members have been successfully rescued with the support of the Indian Coast Guard and Indian Navy. Among the rescued, five crew are reported injured, including two critically, who are now stable and have been landed at New Mangalore Port. The vessel remains unmanned, adrift, and continues to emit smoke and flames from Bay Nos. 2 and 3 (port and starboard). Fuel oil tanks located in proximity to the fire are of major concern due to the potential for escalation. **The vessel is drifting at approximately 1.0 nm in a southerly direction and is an imminent threat considering the fuel onboard combined with 157 IMDG containers including 32.2 Tons of Nitrocellulose with Alcohol.**

4. Additional Support:

T&T Salvage has been formally appointed by the shipowners. However, the expert firefighting personnel are yet to be appointed; discussions are ongoing regarding mobilization or consultation of professionals from the UK or Netherlands. MPA

Singapore has recommended immediate commencement of boundary cooling near the affected bays and adjacent fuel tanks to prevent secondary fire hazards. Coordination for landing the Flag State investigator is underway between MPA, DGS, and MMD Kochi. Efforts are also being made to assess and mitigate environmental risks through collaborative support from the Kerala State Disaster Management Authority (KSDMA).

5. Current Vessel Condition:

The vessel remains afloat but unmanned. Fire is actively burning in the forward cargo holds (Bay Nos. 2 and 3) and **fire has spread aft towards the accommodation area since morning**. There are no reports of water ingress or structural instability at this stage. **However, the presence of approximately 2000 tonnes of fuel oil and 240 tonnes of diesel oil in tanks located adjacent to the fire zone increases the risk of escalation.** Due to the presence of IMDG cargo, firefighting operations are currently being done cautiously pending hazard verification and expert advice on appropriate extinguishing methods. Salvors and emergency towing vessels are expected to reinforce containment efforts upon arrival.

The immediate concern remains containing the drift of the vessel away from the Indian coast and considering the magnitude of fire, connecting a towline will remain extremely challenging and alternative options are being considered with Indian Navy and Indian Coast Guard.

6. Navigational Hazards:

Approximately 10–15 containers have been sighted adrift in a southeasterly direction by Coast Guard aircraft. The estimated speed of drift is 1–1.5 knots. If unmitigated, these may reach the coast around 12 June 2025. The contents of the floating containers remain unknown, and their potential for hazard is still under assessment. INHO and INMCC have been requested to issue navigational warnings. KSDMA has undertaken responsibility to produce a drift forecast map and share alerts with coastal district administrations.

7. Coordination Measures:

An emergency coordination meeting was convened on 09 June 2025 at 1730 hrs IST. The meeting was attended by DGS, MRCC Mumbai, ICG, Indian Navy, Wan Hai Lines, T&T Salvage, and MPA Singapore. Key directives issued during the meeting include the immediate need to initiate boundary cooling operations, subject to clearance from firefighting experts. Owners were instructed to submit the vessel's General Arrangement (GA) Plan, fuel and ballast distribution, and full IMDG cargo manifest, including exact stowage locations. Wan Hai Lines confirmed that their agent at New Mangalore Port is coordinating for crew reception and medical arrangements. MPA Singapore confirmed that its investigator will coordinate with DGS and MMD Kochi for on-ground facilitation.

8. Cargo Assessment:

As per the owners, MV WAN HAI 503 is carrying approximately 157 IMDG containers. The contents include IMDG Classes 3 (flammable liquids), 4.1 (flammable solids), 4.2 (substances liable to spontaneous combustion), 4.3 (substances that, when in contact with water, emit flammable gases), 6.1 (toxic substances), 8 (corrosive substances), 9 (Miscellaneous Dangerous Substances and Articles). A comprehensive IMDG manifest is still awaited. Preliminary visuals and vessel plans indicate that the affected bays are situated adjacent to side fuel oil tanks. It has also been confirmed that three fuel oil tanks are located near the current fire zone. Immediate expert assessment of cargo hazards and firefighting strategies is necessary before physical suppression can begin. Salvors have committed to reviewing the manifest and providing recommendations as soon as full cargo information is received.
